Resume:

I started my career working as an IT technician and studying computer networks, after four years of experience, having been responsible for the support team, networks and training in the system. I started my own business outside the IT area, a period that I gained experience in the commercial and large area importance for the development of some soft skills. I also had the opportunity to graduate in Commercial Management and then MBA in Project Management.

Always guided by the love of technology and the desire to do something that really brings some value society, in 2019 I decided to change my career and return to IT in the development area. Today I study software engineering, currently in the 4th semester. Currently working with development front-end and I have been looking for constant learning in the main technologies like HTML, CSS, Javascript and React with the desire and desire to become a qualified professional to contribute to the creation and articulation of solutions that positively impact people's lives.
